Backlog

Option to "use local/server version" feature

It usually displays this message when you close an unsaved page when you do it on purpose, and it's getting frustrated to see this every time.

UPDATES

Add/modify your own CSS-Selectors

Website Design: The ability to add/modify your own CSS-Selectors like its done in Venus.

PENDING

Shortcode for templates to display correctly

When you save some sections as a template and then paste a shortcode to a new page, the layout is broken, some styles are missing - in the editor.

ERRORS

In progress

General ideas to improve 'Edit' workflow

Currently, I have a few templates in the Local Library and when I want to add them I'm always presented (by default)

PENDING

Shortcode for templates to display correctly

When you save some sections as a template and then paste a shortcode to a new page, the layout is broken, some styles are missing - in the editor.

UPDATES

[UX Design] - Set the default Library tab

I want to be able to set the default Library tab (or a way to remember the last active tab), especially when I already...

ERRORS

Done

Copy/Paste elements between pages

We can only copy/paste elements (or group of elements) in the same page, which is quite limited.

DONE

Remove Extra DIV for each container added

I still hope there won't have an extra div for each container we added. It should be something for better styling...

DONE

Add Figma files for the Library design blocks

I want to present my clients the Figma files first, so it would be great if you add those as well, more manual downloads...

DONE

General Information

As we live, our hearts turn colder. Cause pain is what we go through as we become older. We get insulted by others, lose trust for those others. We get back stabbed by friends. It becomes harder for us to give others a hand. We get our heart broken by people we love, even that we give them all...
